- STEP 3** Install the exhaust deflectors on the short outlet pipe of each muffler. Push them on as far as they will go and rotate the deflector so the outlet is pointing “down”. Tighten the clamp screw securely.
- STEP 4** Determine the orientation of the two Kuryakyn extensions. The large outlet hole should face down. (The openings at the rear of the extension are cosmetic only. This design will help keep your saddlebags free of soot.) The end caps should be at an angle similar to the bottom portion of the saddlebags.
- STEP 5** Using the included fasteners, loosely attach each extension to their respective muffler. The stock mounting points are used.
- STEP 6** With the bike standing upright, adjust the position of the extensions so they are level.
- STEP 7** Tighten the mounting screws securely.

ATTENTION! It is the installer’s responsibility to ensure that all of the fasteners (including pre-assembled) are tightened before operation of the motorcycle. Küryakyn will not issue a warranty on components lost due to improper installation. Periodic maintenance may be required.
